

# Mahmut Kaya

QA Engineer

## About Me

ISTQB certified, Test Automation Engineer with 6 years of experience in Software Testing and web development and 5 years of Turkish language teaching.

- Designed and implemented different automation frameworks from scratch for ui, api and db (web, mobile and desktop apps).
- Used Selenium, Playwright, WinappDriver (for desktop app), Appium, Cucumber, Java, JavaScript & Typescript and SQL.
- Mentoring and teaching automation tools, Java and JavaScript to beginners and medior level testers/developers since 2018 online and offline.
- Worked in several companies in different fields as web-developer and test automation engineer.

## Employment History

### QA Automation Engineer at Merych

December 2022

Started my own testing company with two other friends.

#### Projects I worked on:

- **Elsevier:** Involved in converting a selenium & java framework to the playwright - cucumber and typescript. Had sessions with developers to help them understand the automation and write/maintain their own scenarios. Also worked on api side using java and rest-assured.
- **Please:** Initialized a framework from scratch with playwright - cucumber and typescript for ui, api and db. Also mentored their functional tester and developers to write new scenarios and maintain the framework.

### QA Automation Engineer at spriteCloud, Amsterdam

August 2021

- Involved in converting a js & webdriver-io framework to the java & serenity.

#### Technologies used include:

Java, Serenity, Cucumber, Rest-assured

### QA Automation Engineer at Woonenzo, Tilburg

November 2020 — August 2021

- Involved in developing BDD frameworks from scratch.
- Developed frameworks for web and mobile applications.

#### Technologies used include:

Java, MySQL, TypeScript, Jenkins, Docker, Selenium, Cucumber, Appium, Playwright
